

# room with a view...

Pairing the latest firebox technology with the best of modern design, Stovax's contemporary View stove is sure to transform your living space. Triple air systems provide a clean burn and ultimate control, as well as outstanding views of the flames. The high efficiency View, complete with complimentary stainless steel tool and integral glass plinth, offers clean, crisp lines and designer styling that can be further extended with the addition of the optional ceramic glass top plate. With this striking stove, you can always be sure that your room has a 'view' to be proud of.
